

About Us

PRM Green Technologies was established in 2005 to offer a free collection and recycling service for schools in the Midlands area. In 2009 we successfully expanded this operation to offer a one stop recycling service, to all government, education, councils, the NHS and corporate institutions from any location on the UK mainland.

PRM Green Technologies has now reused and recycled equipment from over 30,000 sites from across the entire UK, saving thousands of tonnes of computer waste each year from entering landfill sites.

PRM Green Technologies are at the forefront of reusing and recycling computers, monitors and associated equipment. We operate a zero waste to landfill policy. Any items that are beyond repair are broken down into plastics, metals, circuit boards etc and sold for reuse. We are fully certified by the Environment Agency and produce all paperwork and data destruction certificates free of charge.

PRM Green Technologies' security starts from the moment our enhanced DBS vetted driver, collects your equipment and continues at our secure location. We operate a large CCTV and GPS controlled fleet with an authorised treatment facility that is protected 24-7 and fully alarmed with CCTV monitoring and RFID cards for all employees to provide reassurance to clients that their data is never at risk.

Core to these services is the secure data deletion utility. Our forensic wiping procedure eliminates all traces of data from hard drives and complies with CESG Infosec Level 5 approved standard of sanitisation to ensure complete data destruction. PRM Green Technologies guarantee the total removal of all data, as well as the removal of all identification markings. If for any reason the hard drive data cannot be erased, then it will be physically destroyed.

We are continuing to expand, enabling us to react quickly and efficiently to our clients' demands. We can deal with every level of recycling request, including site clearances for which we can provide a survey team free of charge. Just call us to enquire about this extra free service on

0800 840 9195.

We also work closely with selected third party facilitators to provide end to end compliance on their behalf for their clients. We can help your company become part of this successful opportunity by calling us now on **0800 840 9195**.

As a company we are looking ahead to further expand, and meet the ever growing demand for a quality, effective and reliable service, with an emphasis on ethical responsibility and sustainability.
